

Jay Hazra Ph.D.

Associate

Dr Jay. Hazra has 43+ years of extensive consulting and management experience in engineering, manufacturing, marketing, global supply chain, strategic planning and operations. Jay's business acumen, consulting and operational expertise have been globally utilized by his clients. His expertise spans across automotive, aircraft, machine tools, energy and power generation, and green energy initiatives, including Biofuels. He has consulted with small, medium and large businesses globally, effectively handling multicultural challenges and helped businesses achieve and exceed targets of excellence. Jay has owned his own consulting firm focused on business management, and operations, providing turn arounds and acquisition support to his customer base. Jay's implementation role of his strategies in manufacturing and operations have yielded continuous repeat engagements from his business network.
